## WORK HEALTH AND SAFETY FIRST AID REGULATORY PYRAMID

### It's the LAW

If a relevant requirement in the Act or Regulations exists, you must follow the requirements. Penalties may apply if workplaces are found not following the WHS ACT or Regulations.

### NOT the LAW

Following an approved code of practice may achieve compliance with the health and safety duties in the WHS Act and Regulations; however compliance may be achieved by following another method if it provides an equivalent or higher standard of health and safety.

For the full range of National Workplace First Aid Kits see page 13.

### Workplace First aid Kits and Officers Guide

Workplace Size	High Risk	Low Risk	Number of First aid Kits to Workers	Number of First Aid Officers
100 or more workers	No	Yes	1 First Aid Kit for first 50 workers. 2 First Aid Kits for 100 workers . 1 additional First Aid Kit for every 100 workers thereafter.	1 Officer for 25-50 workers. 2 Officers for 51-100 workers. Additional officer for every additional 100 workers.
25 or more workers	Yes	No	1 First Aid Kit for first 25 workers. 1 additional First Aid Kit for every 50 workers thereafter.	1 Officer for up to 25 workers. 2 Officers for 25-50 workers. Additional Officer for every additional 50 workers.
10-100 workers	No	Yes	1 First Aid Kit is to be provided.	1 Officer for 25-50 workers. 2 Officers for 51-100 workers. Additional Officer for every additional 100 workers.
25 or less workers	Yes	No	1 First Aid Kit for first 25 workers. 1 additional kit for every 50 workers thereafter.	1 Officer for 25 workers. 2 Officers for 25-50 workers. Additional Officer for every additional 50 workers.
10 or less workers			1 First Aid Kit.	Risk assessment conducted to identify the need to provide a First Aid Officer.

The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## FIRST AID REGULATORY REQUIREMENTS FOR MY WORKPLACE

### DIVISION 2—PRIMARY DUTY OF CARE

1. A person conducting a business or undertaking must ensure, so far as is reasonably practicable, the health and safety of:
  - a. workers engaged, or caused to be engaged by the person; and
  - b. workers whose activities in carrying out work are influenced or directed by the person; while the workers are at work in the business or undertaking.
2. A person conducting a business or undertaking must ensure, so far as is reasonably practicable, that the health and safety of other persons is not put at risk from work carried out as part of the conduct of the business or undertaking.

For further information **Work Health and Safety Act 2011, Part 2 Health and Safety Duties, Division 2 – Primary duty of care.**

### 42 DUTY TO PROVIDE FIRST AID

1. A person conducting a business or undertaking at a workplace must ensure:
  - a. the provision of first aid equipment for the workplace, and
  - b. that each worker at the workplace has access to the equipment, and
  - c. access to facilities for the administration of first aid.

**Maximum penalty: in the case of an individual—\$6,000, or in the case of a body corporate—\$30,000.**
2. A person conducting a business or undertaking at a workplace must ensure that:
  - a. an adequate number of workers are trained to administer first aid at the workplace, or
  - b. workers have access to an adequate number of other persons who have been trained to administer first aid.

**Maximum penalty: in the case of an individual—\$6,000, or in the case of a body corporate—\$30,000.**
3. For the purposes of this clause, the person conducting the business or undertaking must have regard to all relevant matters, including the following:
  - a. the nature of the work being carried out at the workplace,
  - b. the nature of the hazards at the workplace,
  - c. the size and location of the workplace,
  - d. the number and composition of the workers and other persons at the workplace.

For further information see **Health and Safety Regulation 2011 . Chapter 3 Part 3.2 Division 3 Clause 42.**

### **The Code of Practice on first aid in the workplace is an approved code of practice under section 274 of the Work Health and Safety Act (the WHS Act).**

This Code applies to all types of work and all workplaces covered by the WHS Act, including workplaces that are outdoors, mobile or remote. This Code of Practice has been developed by Safe Work Australia as a model code of practice under the Council of Australian Governments' Inter-Governmental Agreement for Regulatory and Operational Reform in Occupational Health and Safety for adoption by the Commonwealth, state and territory governments.

This Code provides information on **using a risk management approach to tailor first aid** that suits the circumstances of your workplace, while also providing guidance on the number of first aid kits, their contents and the number of trained first aiders that are appropriate for some types of workplaces.

- High risk workplace means a workplace where workers are exposed to hazards that could result in serious injury or illness
- Low risk workplace means a workplace where workers are not exposed to hazards that could result in serious injury or illness

For further information see **Code of Practice, First Aid in the Workplace.**

## SOMETHING EVERY FIRST AIDER SHOULD KNOW

### THE 4 P'S OF FIRST AID:

#### 1. PRESERVE LIFE

Control bleeding, lessen shock, give mouth to mouth or heart massage.

#### 2. PROTECT THE UNCONSCIOUS

Remove the victim from the source or remove the cause  
e.g. active electric wire, protect from the weather.

#### 3 PREVENT

Prevent the injury from becoming worse and cover the wounds, immobilise fractures, make the patient comfortable.

#### 4. PROMOTE

Promote Recovery, lessen anxiety, relieve pain, handle gently.

One day your ability to stay calm in an emergency may mean saving someone's life.  
Your job will be to give assistance by sitting or lying the patient down and feeling for a pulse.

The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## FIRST AID IN YOUR WORKPLACE

Australian workplaces are required to have appropriate first aid equipment available and accessible for all employees. A workplace is most commonly identified as an office, warehouse, manufacturing facility or a construction site. Trucks, delivery vehicles and company cars also constitute a workplace and require appropriate first aid to be on board.

### First Aid Site Assessment

A periodic assessment schedule of your workplace first aid equipment will allow you to identify hazards and determine typical injuries or illness that may require rapid treatment. The assessment should also consider number of employees and work area design as first aid should be easily accessible and available within minutes of the injury location.

### Assessment Guidelines For Workplace First Aid

As business operations are constantly changing to meet customer demands your workplace first aid requirements may also require adjustments.

### High Risk Workplace

A High Risk Workplace describes an environment where workers are exposed to hazards that could result in serious injury or illness and would require first aid. Some examples include:

- Use of hazardous machinery or substances onsite
- Risk of falls
- Extreme heat or cold working conditions
- Hazardous forms of work

### Low Risk Workplace

A Low Risk Workplace describes an environment where workers are not exposed to hazards that could result in serious injury or illness. Offices, shops or libraries are common examples and potential work-related injuries and illnesses requiring first aid would be minor in nature.

*Safe Work Australia, First Aid in the Workplace, released July 2012.*

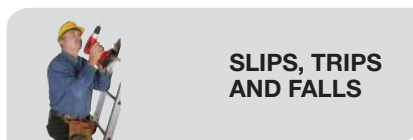

## FIRST AID RECOMMENDATIONS

### STEP 1. IDENTIFY POTENTIAL CAUSES OF WORKPLACE INJURY AND ILLNESS

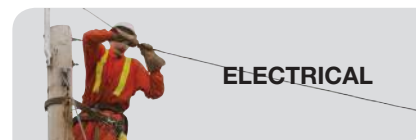

HAZARDS

MANUAL HANDLING

SLIPS, TRIPS AND FALLS

ELECTRICAL

### STEP 2. ASSESS THE RISK OF WORKPLACE INJURY AND ILLNESS

INJURIES

Sprains, Muscular Strain and Fractures caused by Overexertion or repetitive movements.

Fractures, bruises, lacerations, dislocations, concussion caused by falls from heights or uneven surfaces.

Shock, burns, cardiac arrest, loss of consciousness caused by exposure to live electrical wires. Potential ignition source could cause injuries from fire.

### STEP 3. WHAT FIRST AID IS REQUIRED

Choose the First Aid Kit that is suitable for the workplace.

REMEDY

### STEP 4. REVIEW FIRST AID TO ENSURE EFFECTIVENESS

Choose additional Add-On Packs, to ensure the workplace contains adequate First Aid on site at all times.

The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## IMPORTANT COMPLIANCE INFORMATION

All workers must be able to access a first aid kit. This will require at least one first aid kit to be provided at their workplace. See pages 10 for number of kits required for your workplace.

### Location

First aid kits should be kept in a prominent, accessible location and able to be retrieved promptly.

First aid kits should be located close to areas where there is a higher risk of injury or illness. If the workplace occupies several floors in a multi-storey building, at least one kit should be located on every second floor.

### Restocking And Maintaining Kits

A person in the workplace should be nominated to maintain the first aid kit (usually a first aider) and should ensure:

- The kit is fully stocked, monitored and ensure any items used are replaced as soon as practicable after use.
- The first aid kit is checked after each use or at least once every 12 months.
- All items are in good working order, have not deteriorated or have expired as well as the sterile product are sealed and have not been tampered with.

Source: Safe Work Australia, *First Aid in the Workplace*, released July 2012.

Ensure your kit/s are fully stocked and ready to go at all times with one of our complete content refill packs.

## NATIONAL WORKPLACE FIRST AID KIT

All National Workplace First Aid Kits are made in accordance with Safe Work Australia, First Aid in the Workplace Code of Practice and comply to most state regulatory requirements. Featuring industrial quality products that are colour coded and boldly identified in robust and practical cases, to help you find first aid solutions fast and easily in an emergency. Simply choose the kit style that best suits your workplace needs.

Part No.	Case Description	Case Dimensions (W x H x D)
101842	Wallmount ABS Plastic Case	300 x 390 x 150mm
101843	Wallmount Metal Case	240 x 385 x 115mm
101844	Portable Soft Case	400 x 350 x 200mm
101845	Portable Polypropylene Case	420 x 200 x 230mm
101563	National Workplace First Aid Kit Refill	-

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

For Vehicle Kits see page 20.

For kit contents, please see page 28.

## IMPORTANT COMPLIANCE INFORMATION

Certain work environments have greater risks of injury and illness due to the nature of work being carried out and the nature of the hazards at the workplace.

The contents of first aid kits should be based on a risk assessment. For example, there may be higher risk of eye injuries and a need for additional eye pads in a workplace.

### RECOMMENDATION

Additional equipment may be needed for serious burns and outdoor and remote workplaces.

#### OUTDOOR AND REMOTE WORK

If work is performed outside or in remote locations there is a risk of insect, plant stings or snake bites. The following items should also be included in the first aid kit:

- A heavy duty crepe bandage
- Sting relief cream, gel or spray
- A heavy duty crepe bandage 10 cm (for snake bites)
- Large clean sheeting (for covering burns)
- Thermal blanket (for treating shock)
- Whistle (for attracting attention)
- Torch/flashlight

The appropriate contents will vary according to the nature of the work and its associated risks.

#### BURN INJURIES

If your workers are at risk of receiving burns, you should include the following items:

- Burn treatment instructions on two water-proof instruction cards: one for the first aid kit and the other to be located on the wall next to the emergency shower or water supply
- Hydro gel (8 x 3.5 Gram sachets)
- Hydro gel dressings
- Clean polythene sheets (small, medium and large)
- 7.5cm cotton conforming bandage

Source: Safe Work Australia, First Aid in the Workplace, released July 2012.

## NATIONAL WORKPLACE - BURNS FIRST AID KIT

The National Workplace - Burns First Aid Kit has been developed in accordance with First Aid in the Workplace Code of Practice, which has been specifically designed for workplaces with a higher risk of burn injuries.

These kits contains a range of hydro gel products and dressings to ensure you are equipped with the right products at all times. They also come with a large full colour Burns Treatment poster to help guide in administering the causality correctly.

Part No.	Description	Case Dimensions (W x H x D)	
101846	Large Wallmount ABS Plastic Case	400 x 480 x 190mm	◆
101847	Large Portable Soft Case	500 x 300 x 300mm	
101570	Refill Contents Only	-	

## NATIONAL WORKPLACE – OUTDOOR AND REMOTE FIRST AID KIT

**NEW**

It's important that all employees, particularly the ones that work in Outdoor and Remote locations have adequate first aid with them at all times, because of the extended time needed to get to a hospital or ambulance service if an accident were to happen.

This Outdoor and Remote First Aid Kit contains additional items other than first aid treatment products such as sting relief, wind up torch and SOS ground sheet.

Part No.	Description	Case Dimensions (W x H x D)	
101848	Large Portable Soft Case	500 x 300 x 300mm	◆
101726	Refill Contents Only	-	

For kit contents, please see page 28.

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## LEGISLATIVE OBLIGATIONS AND RISK MANAGEMENT

Each must manage its own emergency preparedness based upon risk management processes. The site senior executive (SSE) must ensure the mine has the resources and facilities for the mine's preparedness in reasonably foreseeable emergencies or potential emergency situations. The MQSHR, section 32 and CMSHR, section 35, outline requirements that must be addressed when developing and implementing effective emergency preparedness strategies.

### FIRST AID SUPPLIES

The most critical equipment required on site is adequate and appropriate first aid equipment and facilities. This equipment is essential for response to any illness or injury that persons may sustain.

To ensure first aid equipment is adequate and appropriate:

- Identify hazards which may cause an injury or illness (also consider workers' existing illnesses, e.g. diabetes, asthma, epilepsy, heart conditions, etc).
- Assess the risk based on the type and extent of injuries or illnesses that may occur.
- Decide on the appropriate first aid equipment and facilities. Standard or generic first aid kits may need to be added to or modified to ensure they meet the needs of the mine.
- Obtain the identified first aid equipment and facilities.
- Monitor and review first aid equipment, facilities and services to ensure they continue to meet requirements.

The first aid kit must be appropriate for the types of injuries and illnesses likely to occur at the mine. Consider the following:

- The first aid kit can be any size, but must be large enough to fit all the required contents.
- A portable kit, or multiple kits, may be required.
- Consider placing appropriate kits in all mobile equipment.
- First aid kits' locations should be clearly signed.
- Include single use, disposable items in the kit where possible. Reusable items must be cleaned, sterilised and disinfected.

*Guidance Note QGN 15. Emergency preparedness for small mines and quarries. Coal Mining Safety and Health Act 1999. Mining and Quarrying Safety and Health Act 1999*

For First Aid Signage see pages 50-51.

## MINING FIRST AID KIT

**NEW**

These First Aid kits have been designed specifically for the Mining Industry and contain most items recommended in the Mining and Quarrying Safety and Health Act 1999, Appendix 2. They have been developed with a wide range of content and to give a foundation to add on any additional items that maybe required on site once determined after a site risk assessment has been carried out.

The ABS Wall mount kit contains an 'o' ring around the seal so it seals tight to help resist dust and water from entering the case and deteriorating the content inside. The case also includes shelving and compartment so all content is easily stored and identifiable in an emergency.

The Portable kit is made out of robust and durable plastic with carry handle to quickly maneuver to causality if required. Contains fold out shelving to easily locate product and keep them secure during transit. Recommended for vehicles and remote locations.

For kit contents, please see page 28.

Part No.	Description
101858	Large Wallmount ABS Plastic Case
101888	Portable Polypropylene Case
101893	Refill Pack Content Only

**i** As required by WHS regulation a first aid kit on any worksite must be checked regularly and fully stocked at all times. Our Refill pack is a quick and easy solution to ensure you have additional content to maintain and restock your kits.

At Brady we can develop and customise a First Aid Kit that suits your workplace requirement to ensure you have the right product on-hand when you need it most. Simply call our Customer Service Team on 1300 720 024 and see how we can help you.

Please note: Minimum order quantity may apply for customised kits.

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

A food business/manufacturer must take all practicable measures to ensure that any food no matter what part of its life cycle, is protected from the likelihood of contamination.

### Hygiene of food handlers

In the event of an injury a food handler must, when engaging in any food handling operation take all practicable measures to ensure there is no foreseeable food contamination and apply appropriate first aid immediately. Only on exposed body parts such as fingers, hands, arms etc bandages and any dressings used to cover would need to be completely covered with a waterproofed covering to help prevent contamination.

## IMPORTANT COMPLIANCE INFORMATION

**Food Safety Program** means a program set out in a written document retained at the food premises of the food business, including records of compliance and other related action, that;

- a. systematically identifies the potential hazards that may be reasonably expected to occur in all food handling operations of the food business;
- b. identifies where, in a food handling operation, each hazard identified under paragraph (a) can be controlled and the means of control;
- c. provides for the systematic monitoring of those controls;
- d. provides for appropriate corrective action when that hazard, or each of those hazards, is found not to be under control;
- e. provides for the regular review of the program by the food business to ensure its adequacy; and
- f. provides for appropriate records to be made and kept by the food business demonstrating action taken in relation to, or in compliance with, the food safety program.

### Food handling - skills and knowledge

A food business must ensure that persons undertaking or supervising food handling operations have:

- a. skills in food safety and food hygiene matters; and
- b. knowledge of food safety and food hygiene matters,

*Source: Australia New Zealand Food Standards Code - Standard 3.2.2- Food Safety Practices and General Requirements (Australia Only).*

## FOOD & BEVERAGE MANUFACTURING FIRST AID KIT

**NEW**

Developed specifically for the food and beverage industry this kit contains a wide range of blue detectable strips and tapes as well as burns treatment products and other additional items to administer appropriate first aid in an emergency.

All items come in a ABS plastic case which can be mounted to a wall for quick and easy accessibility in a emergency. The case also features an 'O' ring around the seal to prevent water contaminating the content inside during wash down.

### STANDARD PACKAGE: 1

Part No.	Description
101849	ABS Wall Mount First Aid Kit
101711	Refill Content Only

## BLUE DETECTABLE WOUND PACK

**NEW**

This range of water resistant blue adhesive strips are visually and electromagnetically detectable to reduce and help prevent the risk of food contamination.

### STANDARD PACKAGE: 1

Part No.	Description
101733	Blue Detectable Wound Pack

## CATERER'S FIRST AID KIT

Respond quickly to kitchen emergencies with the Caterer's First Aid Kit. Caterers have special needs - minor cuts and burns need to be treated promptly so they can get on with their job in a safe manner. Our Caterer's Kit provides a range of products suited to this need.

### DIMENSIONS:

260 x 170 x 85mm (WxHxD)

### STANDARD PACKAGE: 1

Part No.	Description
101921	Caterer's First Aid Kit

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

For kit contents, please see page 28.

## ELECTRICAL TRADES FIRST AID KIT

This Electrician's First Aid Kit has been made in accordance to the, NSW Guide to Electrical Workers' Safety Equipment (Trade & Investment Dept), and built to match the emergency needs of the tradesmen and their team. The robust design soft case is ideal for keeping onboard your work vehicle or for carrying to an emergency situation.

**DIMENSIONS:** 400 x 350 x 200mm (WxHxD)  
**STANDARD PACKAGE:** 1

Part No.	Description
101850	Electrical Trades First Aid Kit

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

For kit contents, please see page 28.

## INDUSTRY INFORMATION

As stated in Key Work Health and Safety Statistics 2013, between the year of 2010-2011 5% of recorded work related fatalities were caused by Electrocutation in Australia.

Source: Key Work Health and Safety Statistics 2013, Work-related Traumatic Injury Fatalities, 2010–11.

### WORKER FATALITIES: Number of traumatic injury fatalities by mechanism of injury

Mechanism of injury	2008–09	2009–10	2010–11
Vehicle incident	133	103	79
Falls from a height	34	24	29
Being hit by moving objects	36	23	27
Being hit by falling objects	22	18	26
<b>Electrocutation</b>	<b>9</b>	<b>13</b>	<b>12</b>
Being trapped between stationary & moving objects	12	9	13
Being trapped by moving machinery or equipment	8	7	11
All other mechanisms	35	23	23
<b>Total</b>	<b>289</b>	<b>220</b>	<b>220</b>

## AUTOMATIC DEFIBRILLATORS

Providing an automatic defibrillator can reduce the risk of fatality from cardiac arrest and is a useful addition for workplaces where there is a **risk of electrocution** or where there **are large numbers of members of the public**.

Automatic defibrillators are designed to be used by trained or untrained persons. They should be located in an area that is clearly visible, accessible and not exposed to extreme temperatures. They should be clearly signed and maintained according to the manufacturer's specifications.

Source: Safe Work Australia, First Aid in the Workplace, released July 2012.

## DEFIBRILLATOR

- Flashing light indicators to aid rescuer during use
- 7 year standby / 300 shocks / 16hr continuous operation\*
- Daily, weekly and monthly automatic self tests

From the moment someone suffers sudden cardiac arrest the inspired design features of the Lifeline AED (Automatic External Defibrillator) shave precious seconds off the defibrillation process. It is designed for speed and simplicity.

Semi and Auto AED packages comes complete with a 7 year battery, carry case, rescue kit, pair of adult electrode pads, quick use card and user manual. View model with 4 year battery, pair of adult electrode pads and user manual.

Part No.	Description
100114	Lifeline Semi AED 7 Year Battery Package
101473	Lifeline Auto AED 7 Year Battery Package
101474	Lifeline View AED
100115	Lifeline AED 7 Year Replacement Battery Pack
100116	Replacement Pads Adult (For Semi And Auto Models)
875448	Replacement Pads Adult (View AED)
875449	Replacement Pads Pediatric (View AED)
100117	Lifeline AED Complete Trainer Package

\*7 year battery applies to the Semi and Auto models only.

101474

101473

100114

### HANDLE THIS

Roomy, sure-grip rubberised handle makes it simple to pull off the wall and carry quickly to the patient.

### PADS AT THE READY

The electrode pads are tucked into a back pocket ready to apply.

### BIG BUTTONS

The "Power On" and "Shock" buttons are oversized and brightly lit so even the most nervous fingers will hit their mark.

For Electric Shock Survival Signs & Posters see page 27.

## EMERGENCY BURNS STATION

A specialised first aid unit for areas where there is potential for burns to occur. Supplied in a tough polypropylene wall mountable case that is easily snaps out of the bracket for easy transportation to the site of the burned casualty. Includes a range of hydrogel products for when cool running water may not be available. Hydrogels are a recognised treatment for burns.

**DIMENSIONS:** 250 x 200 x 90mm (WxHxD)  
**STANDARD PACKAGE: 1**

Part No.	Description
101851	Emergency Burns Station

### Kit Contents:

- 1 x Burnaid Burn Gel 25g
- 2 x Burnaid Pad 10 x 10cm
- 1 x Burns Sterile Dressing 70x75cm
- 1 x First Aid Booklet
- 1 x Gauze Sterile Pieces 7.5cm - Pk5
- 1 x Hot/Cold Pack - Small
- 1 x Instant Cold Pack - Small
- 5 x Non-Adherent Dressing 5 x 7.5cm
- 5 x Non-Adherent Dressing 7.5 x 10cm
- 1 x Sodium Chloride 0.9% 500ml

## BURN MANAGEMENT PACKS

Early intervention to cool and treat burns can help reduce the severity of the injury. Workplace hazards that may result in burn injuries need to have burn management solutions readily available to reduce delays in first aid treatment. Cool water availability is of paramount importance. As a supplement, or where water is not readily available Australian Resuscitation Council guidelines make provision for the use of hydrogel as an acceptable treatment alternative.

Our Burn Management Packs provide suitable burn treatment products for emergency situations.

**STANDARD PACKAGE: 1**

Part No.	Description
101197	Small Burn Management Pack
101191	Large Burn Management Pack

Small Burns Pack

Large Burns Pack

### Kit Contents:

- 1 x Adhesive Tape Paper 2.5x5m
- 2 x Burnaid Pad 10 x 10cm
- 1 x Burnaid Pad 20 x 20cm
- 2 x Burnaid Sachet 3.5g
- 2 x Non-Adherent Dressing 7.5x10cm

### Kit Contents:

- 2 x Adhesive Tape Paper 2.5cm x 5m
- 2 x Burnaid Pad 20x20cm
- 1 x Burnaid Pad 55x40cm
- 4 x Burnaid Sachet 3.5g
- 1 x Burns Sterile Dressing 70x75cm
- 1 x Cool-It Spray 200g
- 2 x Non-Adherent Dressing 7.5x10cm
- 2 x Sodium Chloride 0.9% 500ml

## WOUND MANAGEMENT PACKS

To stop a casualty bleeding is one of the most urgent needs in an emergency. If your workplace is assessed as having the potential for elevated hazard risks, a wound management pack will enhance the emergency preparedness of your sites first aid facility. Ideal for high risk environments, choose from either the minor or major wound management pack.

Small Wound Pack

### Kit Contents:

- 1 x Adhesive Tape Paper 2.5cmx5m
- 1 x Basic Dressing Pack - single use
- 1 x Combine Dressing 10x20cm
- 2 x Gauze Sterile Pieces 7.5cm - Pk3
- 1 x Med. Support Crepe Bandage 5cm (W)
- 2 x Med. Support Crepe Bandage 7.5cm (W)
- 1 x Med. Support Crepe Bandage 10cm (W)
- 2 x Non-Adherent Dressing 5x7.5cm
- 1 x Non-Adherent Dressing 7.5x10cm
- 1 x Plain Seal Plastic Bag - Large
- 2 x Povidone Iodine U.S.P Prep Pad
- 2 x Skin Closure 6x38mm
- 3 x Sodium Chloride 20ml - Pk5
- 1 x Wound Dressing No.15

**STANDARD PACKAGE: 1**

Part No.	Description
101193	Small Wound Management Pack
101192	Large Wound Management Pack

Large Wound Pack

### Kit Contents:

- 2 x Adhesive Tape Paper 2.5cm x 5m
- 2 x Basic Dressing Pack - single use
- 2 x Combine Dressing 10 x 20cm
- 6 x Non-Adherent Dressing 7.5x10cm
- 4 x Gauze Sterile Pieces 7.5cm - Pk3
- 1 x Heavy Crepe Bandage 10cm (W)
- 1 x Med. Support Crepe Bandage 7.5cm (W)
- 1 x Med. Support Crepe Bandage 10cm (W)
- 1 x Multi-Trauma Dressing 25 x 76cm
- 4 x Plain Seal Plastic Bag - Large
- 12 x Povidone Iodine U.S.P Prep Pad
- 2 x Skin Closure 6x38mm
- 4 x Skin Closure 6x75mm
- 10 x Sodium Chloride 20ml - Pk5
- 1 x Triangular Bandage 110x155cm
- 1 x Universal Trauma Scissors - Large
- 1 x Wound Dressing No.13
- 1 x Wound Dressing No.14
- 1 x Wound Dressing No.15

First aid products may vary from photo and contents list shown in the catalogue due to component availability at time of manufacture. The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## IMPORTANT COMPLIANCE INFORMATION

Eye wash equipment should be provided where there is a risk of hazardous chemicals or infectious substances causing eye injuries.

Immediate access should be provided to shower equipment in workplaces where there is a risk of:

- Exposure to hazardous chemicals resulting in skin absorption or contamination from infectious substances
- Serious burns to a large area of the face or body (including chemical or electrical burns or burns that are deep, in sensitive areas or greater than a 20 cent piece)

Source: Safe Work Australia, *First Aid in the Workplace*, released July 2012.

### Did you know?

Vehicles transporting Dangerous Goods (specifically Placard class, 2.3, 3, 4, 5.1 (Solids), 5.1 (Liquids), 5.2, 6.1, 8, 9) must have an eyewash kit at least 250ml capacity, filled and ready for use at all times.

Source: Australian Dangerous Goods Code 7th Edition.

## EYE WASH AND IRRIGATION SOLUTIONS

These single use products provide a hygienic eyewash and irrigation solution whenever and wherever you need one. They contain a Sterile Sodium Chloride (Saline) solution. Available in 20ml, 100ml and 500ml single use containers. Wall panels available for 100ml and 500ml bottles.

Part No.	Description
101154	Eyewash & Irrigation Solution 500ml
101155	Eyewash & Irrigation Solution 100ml
11960	Eye Wash Wall Plate to Suit 100ml
11940	Eye Wash Wall Plate to Suit 500ml
101055	Sodium Chloride 20ml - Pk5

## EYE INJURY MANAGEMENT PACKS

Eye injuries can happen in an instant. Gentle irrigation is often a simple way to dilute or flush out foreign substances before more serious damage can occur. Our Eye Injury Management Packs in the hands of trained first aid personnel provide rapid first response in case of an emergency. Keep handy anywhere eye injury risks exist.

Small Eye Pack

Large Eye Pack

#### Kit Contents:

- 1 x Adhesive Tape Paper 2.5cm x 5m
- 2 x Eye Pad Single
- 1 x Sodium Chloride 20ml - Pk5

#### Kit Contents:

- 1 x Adhesive Tape Paper 2.5cm x 5m

The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority.

## IMPORTANT COMPLIANCE INFORMATION

As per the Safe Work Australia First Aid in the Workplace Code of Practice 2012, all workers must be able to access a first aid kit at all times. This will require at least one first aid kit to be provided at their workplace.

**A portable first aid kit should be provided in the vehicles of mobile workers** if that is their workplace (for example, couriers, taxi drivers, sales representatives, bus drivers and inspectors). These kits should be safely located so as not to become a projectile in the event of an accident.

Source: Safe Work Australia, First Aid in the Workplace, released July 2012.

### VEHICLE AND LOW RISK FIRST AID KIT SOFT CASE

This popular first aid kit is great value for money. It has a simple design and practical internal layout, supplied in an embroidered, hardwearing, zippered, 600D/PVC case. This compact kit is ideal for the glove box, cupboard or suitcase.

**i** Pending on the work being carried out, some types of workplaces may require additional items to treat specific types of injuries or illnesses.

After you have done your worksite assessments a standard first aid kit may not cover the potential injuries that could occur to which additional content such as bandages, splints and dressings may need to be added to the kit.

## Snake Bite Pack

Snake bites can be deadly. While effective anti-venom are available, pressure immobilisation is recommended until medical aid can be administered. Our Snake Bite Pack ensures you have the appropriate products available to administer immobilisation techniques in these emergencies, an ideal addition to outdoor work kits.

### STANDARD PACKAGE: 1

Part No.	Description
101194	Snake Bite Pack

## Snake Bite and Insect Stings First Aid Kit

**NEW**

It's imperative you have the right product on hand when administering Snake Bites and Insect Stings. This kit contains wide variety of bandages, instant ice packs and relief cream. It also includes a snake identification card and a detailed first aid instruction guide.

### STANDARD PACKAGE: 1

Part No.	Description
875499	Snake Bite and Insect Stings First Aid Kit

## Snake Bite First Aid Kit

A snake bite requires prompt treatment. The snake bite kit contains all you require to administer the latest snake bite first aid techniques.

**DIMENSIONS:** 160 x 120 x 60mm (WxHxD)

### STANDARD PACKAGE: 1

Part No.	Description
T30020	Snake Bite Kit

## Handy Pocket First Aid Kit

Suitable for low risk workplace or a work vehicle engaged in low risk activities. Easily fits into glove box or office draw.

**DIMENSIONS:** 190 x 210 x 50mm (WxHxD)

### STANDARD PACKAGE: 1

Part No.	Description
T33755	Handy Pocket First Aid Kit

## Trauma Pack

Our Trauma Pack is a must for high risk work environments. Providing CPR, bleeding and shock treatment options in one package.

### STANDARD PACKAGE: 1

Part No.	Description
101201	Trauma Pack

## Fracture Pack

Our fracture pack provides easy to use splinting/immobilisation products for emergency situations. Foam covered formable aluminium splints suit most applications.

### STANDARD PACKAGE: 1

Part No.	Description
101198	Fracture Pack

## Outdoor Pack

Add the Outdoor Pack to your first aid kit to ensure your first aid kit content is suitable for workers that work in or around extreme heat or cold and open to the risk of insect and snake bites.

### STANDARD PACKAGE: 1

Part No.	Description
101489	Outdoor Pack

## Remote Area Pack

Meets and exceeds the Code of Practice for First Aid In The Workplace contents for first aid modules nationally. Recommended for workers working remotely or away from First Aid facilities and ideal for high risk.

### STANDARD PACKAGE: 1

Part No.	Description
101491	Remote Area Pack

For kit contents, please see page 28.

## IMPORTANT COMPLIANCE INFORMATION

First aiders should take standard precautions to avoid becoming ill and exposing others to illness when handling blood or body substances. Standard precautions include hand hygiene, use of personal protective equipment, appropriate handling and disposal of sharps and waste, cleaning techniques and managing spills of blood and body substance.

### CONTAMINATED ITEMS

All items that are soiled with blood or body substances should be placed in plastic bags and tied securely. Waste disposal should comply with any state or local government requirements.

Sharps, including scissors and tweezers that have become contaminated with blood or body substances should be disposed of in a rigid-walled puncture-resistant sharps container by the person that used them. Guidance on the design, construction, colour and markings of sharps containers is provided in:

- AS 4031 – Non-reusable containers for the collection of sharp medical items used in health care areas
- AS/NZS 4261 – Reusable containers for the collection of sharp items used in human and animal medical applications

Source: Safe Work Australia, *First Aid in the Workplace*, released July 2012

See Sharps Containers below.

## SHARPS CLEAN UP KIT

Keep the Sharps Clean Up kit handy for the safe collection and disposal of potentially dangerous sharps such as used syringes etc.

### Kit Contents:

- 1 x Instructions for use
- 1 x Sharps safe
- 1 x Nitrile Gloves - Pair
- 1 x Plastic bag

37822	Sharps Disposal 1.4L

## BIOHAZARD CLEAN UP KIT

**NEW**

Body fluid and blood borne pathogens are a constant risk if not handled properly. A duty of care involves having appropriate materials available to safely clean up a body fluid spill. Biohazard clean up kit comes complete with everything you need to have an effective spill management system. Biohazard clean up kit has been designed to meet infection control and work cover guidelines.

### Kit contents

- 1 x Instruction sheet
- 1 x Face mask with eye shield
- 1 x Polyethylene apron
- 1 x Pair of nitrile gloves
- 1 x 200g sachet absorbent powder
- 1 x Scoop and scraper
- 2 x Yellow clinical waste bag with tie
- 1 x Bottle of pH neutral detergent
- 2 x Absorbent cleaning clot

**STANDARD PACKAGE: 1**

Part No.	Description
848836	Biohazard Clean Up Kit

## FIRST AID ROOMS

A first aid room should be established at the workplace if a risk assessment indicates that it would be difficult to administer appropriate first aid unless a first aid room is provided.

A first aid room is recommended for:

- **LOW** risk workplaces with 200 workers or more
- **HIGH** risk workplaces with 100 workers or more

The contents of a first aid room should suit the hazards that are specific to the workplace. The location and size of the room should allow easy access and movement of injured people who may need to be supported or moved by stretcher or wheelchair.

### Items should be provided in the room:

- ✓ A first aid kit appropriate for the workplace
- ✓ Hygienic hand cleanser and disposable paper towels
- ✓ An examination couch with waterproof surface and disposable sheets
- ✓ An examination lamp with magnifier
- ✓ A cupboard for storage
- ✓ A container with disposable lining for soiled waste
- ✓ A container for the safe disposal of sharps
- ✓ A bowl or bucket (minimum two litres capacity)
- ✓ Electric power points
- ✓ A chair and a table or desk
- ✓ A telephone and/or emergency call system
- ✓ The names and contact details of first aiders and emergency organisations

### A first aid room should:

- ✓ Be located within easy access to a sink with hot and cold water (where this is not provided in the room) and toilet facilities
- ✓ Offer privacy via screening or a door
- ✓ Be easily accessible to emergency services (minimum door width of 1 metre for stretcher access)
- ✓ Be well lit and ventilated
- ✓ Have an appropriate floor area (14 square metres as a guide)
- ✓ Have an entrance that is clearly marked with first aid signage

Part No.	Description
101264	FAC Pro Back Board
873188	Nylon Stretcher Restraints 5cm x 2m

## BASKET STRETCHER

Light and portable rigid first aid stretcher. Designed to immobilise the casualty and minimise the risk of further trauma. Splits into two sections for compact storage and supplied with restraints and bridle. A spine board, backboard or scoop stretcher should be used to aid patient lifting in and out of the Basket Stretcher.

**DIMENSIONS:** 2170 x 430 x 90mm (LxWxH)

**WEIGHT:** 20kg

**LOAD CAPACITY:** 150kg

Part No.	Description
101265	FAC Pro Basket Stretcher
873188	Nylon Stretcher Restraints 5cm x 2m

## IMMOBILISATION EXTRICATION DEVICE

Provides immobilisation in the sitting position. Uses colour coded body strap system. Comes complete with two reusable plastic coated head/chin straps, neck pads and durable carry case.

**UNFOLDED DIMENSIONS:** 820 x 770mm (LxW)

**WEIGHTS:** 2.5kg

Part No.	Description
101266	FAC Pro Immobilisation Extrication Device

## ELECTRICAL SHOCK SURVIVAL SIGN

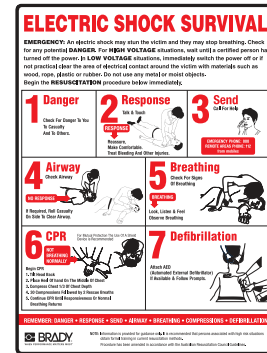

NEW

Display the Electric Shock Survival sign in area where your employees can effectively use it in the event of an emergency. This sign is manufactured to comply with the Australian Resuscitation Council Guidelines and is also available in reflective metal which is suitable for dark areas such as mines.

### STANDARD PACKAGE: 1

Part No.	Description
833590	Poly 450 x 600
835989	MTL 450 x 600
851258	C1 Ref. MTL 450 x 600
851259	C2 Ref. MTL 450 x 600
851738	MTL 600 x 900

\* It is recommended that this sign is used in conjunction with a formal first aid training course.

## WORKPLACE SAFETY POSTERS

NEW

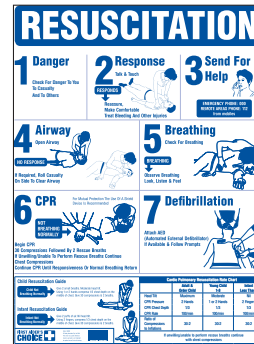

These posters are laminated for extra durability and have easy-to-follow instructions. Display in prominent positions around your workplace to provide adequate instruction in the event of a workplace emergency or accident and to promote health and safety workplace practices.
