CHOOSING YOUR SORBENTS

Having the right sorbent for the job makes a big difference. Proper product selection can make your job easier, create a safer work environment, and even save you money!

These easy steps below will help you find the correct sorbent product for your application.

KNOW WHAT YOU'RE ABSORBING

GENERAL MAINTENANCE

All-purpose products that clean-up oils, coolants, solvents and water-based fluids anywhere in your facility. Use in messy traffic areas or for general maintenance projects.

Your Spill:

- Coolants
- Solvents
- Gasoline
- Vegetable oil
- Kerosene
- And other water-based fluids

OIL ONLY SORBENTS

These sorbents are specialised for oil and other petroleum-based spills including paints and other non-water soluble chemicals. These sorbents will not absorb water and will float indefinitely.

Your Spill:

- Hydraulic oil
- Motor oil
- Brake fluid
- Cooking oil
- Turpentine
- And other oil-based fluids

CHEMICAL SORBENTS

Surfactant-treated polypropylene sorbents can be used on a wide range of chemicals, including hydrofluoric acid and are chemically inert, so they will not react with aggressive fluids.

Your Spill:

- Aggressive chemicals
- Citric acid
- Sodium hydroxide
- And other unknown chemicals

CONTAINING AND MANAGING SPILLS IN THE WORKPLACE

According to the Work Health and Safety Regulations 2011 a person conducting a business or undertaking (PCBU) must ensure that where a risk of a Hazardous Chemical spill exists, a spill containment system should be available for the cleanup and disposal of a chemical that spills or leaks.

Spill containment systems are required in each area of the workplace where the hazardous chemical is used, handled, generated or stored. The spill containment system should not create a hazard by bringing together different hazardous chemicals that are not compatible.

Brady's range of Colour Coded sorbent products can help to ensure that Hazardous Chemical spills are managed appropriately and employees are provided with a safe working environment free from potential workplace risks.
