SEND WARNING MESSAGES WITH AN IMPACT

Site safety is serious business. Mark your facility at each point of need with Brady's range of high performance visual warning products. Ensure your safety message is communicated effectively, keeping your employees and visitors safe from harm.

VISUAL WARNING

309

VISUAL COMMUNICATION IN THE WORKPLACE

A VISUAL WORKPLACE IS A SAFE WORKPLACE

Visual communication tools prevent injuries and ensure staff and visitors are aware of possible dangers and protective equipment requirements for designated work areas. Placement of your visual tools should easily locate potential hazardous areas and alert people to proceed with caution.

Safety communication messages should also be easy to understand and be reliable education and warning tools. To remain effective all messages should be regularly reviewed and appropriate safety training be provided to workers.

On this page we have outlined some suggestions that will help you create a visual workplace. Some of the communication benefits include:

- Reduced Injuries
- Ease of Translation
- Productivity Uplift
- Simplicity and Immediacy
- Workplace Specific

COLOUR CODED VISUAL COMMUNICATION

Due to the easy, non-verbal nature of verbal communication some workplaces apply a colour coded system to identify significant information.

RED
Identify or indicate the location of danger, fire protection equipment (reels, hydrants) and apparatus, stop buttons and emergency stop controls.

YELLOW
Designate places where caution should be exercised and where cautionary notices of a general nature should be displayed.

BLUE
Identify mandatory instruction areas (example PPE required area) or places where it is desired to convey information of a general nature.

GREEN
Used for denoting safety and for indicating the location of safety and first aid equipment (PPE, eye wash showers, exit signs).

PRACTICAL VISUAL COMMUNICATION TOOLS

Retractable Barriers

Ideal where a barrier and access is both required. Barriers are easy to set up and ideal for identifying temporary hazards.

Floor Signs

Alert workers and visitors to potential hazards and position these safety signs where they can be easily seen. Ideal for use in mixed traffic areas (vehicles and pedestrians).

Floor Marking Tapes

Suitable for mixed traffic areas (pedestrians and forklifts) or where segregation is important (walkways and aisles or around production areas).

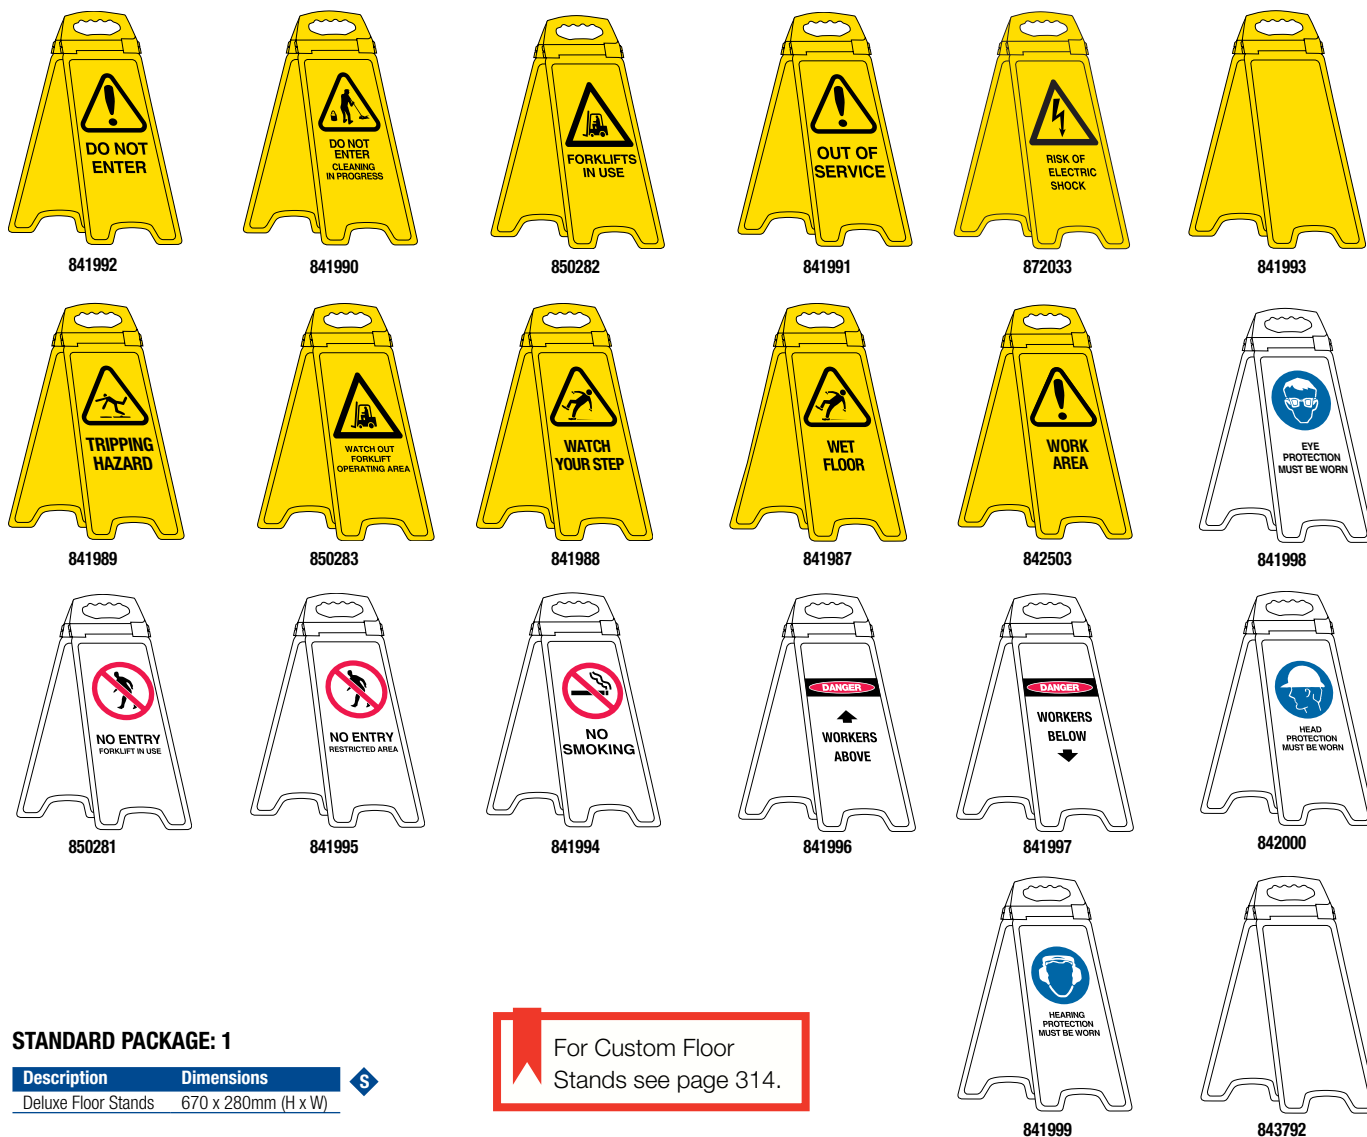

Barricade Tapes

Provide specific warning messages about the work zone. Durable, lightweight and reusable, tapes are easy to use to quickly to block off large areas.

DELUXE FLOOR STANDS

Made from high density polyethylene that will not dent or corrode with a strong hinge construction. Measuring 670mm high (closed) the large message area ensures the sign and your message is visible from over 9 metres away.

ECON-O-CONE SAFETY CONES

These safety cones are made from 5mm thick corrugated polypropylene material, carrying a highly visible message on all four sides. They are extremely durable, lightweight and stackable. The unique hinge construction of the Econ-O-Cone provides for a strong flexible structure, promoting strength while minimising weight. For extra stability, use with weights. Stands 900mm tall with a 300mm square base.

PYRAMIDS

- Tough moulded plastic
- Customise with any text on class 1 reflective backing
- Stackable for easy storage

Available in Blue, Red, White, Yellow and Green, these UV stabilised pyramids are ideal for identifying temporary areas such as blast zones or other restricted access situations, as well as for use in carparks. Three faces are available for custom messages (see to the right for most common) on reflective backing. Please specify message or advise if custom. Perfect for use with solar warning beacons and reflectaline.

Add the pyramid handle (red only) to tie off reflectaline, bunting or solar warning beacon to create a closed work space.

PYRAMID: 885 x 790mm (W x H)
WEIGHT: 9kg

TENSABARRIER® STANCHION SYSTEM - OUTDOOR

The Outdoor Tensabarrier® is ruggedly constructed and can be filled with either sand or water for added stability. Any number of posts can be used together to form a barrier of any required length and configuration. The retractable weather resistant tape spans 3.65 metres and is available in three colours. The PVC post is UV resistant to prevent fading.

(i) Custom options available. Call your distributor for a quote.

Weather Resistant Tape Width 50mm.

Post Diameter 64mm.

Stabilised PVC Post Height 940mm.

Fill base with sand for added stability.

PORTABLE CONE BARRIER SYSTEM

Innovative safety cones and barricade system complements any safety program. Self-retracting belt adjusts up to 1.8 metres and the weight rings provide superior stability. Cones can be easily stored, the small base footprint requires minimum storage space when stacked.

System Includes:
1 x 914mm (H) Cone
1 x Steel Weight Ring (4.5kg)
1 x Belt Cassette (75mm x 1.8m)

Part No.	Description	B
851261	Portable Cone Barrier System	

TENSACONE®

Designed to fit over the top of most standard traffic cones, the Tensacone® unit connects cones together to cordon off 'work in progress' areas utilising 4m of retractable, high visibility chevron webbing. This low cost and flexible solution ensures safety and ease of use and is suited for both indoor or outdoor use.

Part No.	Description	B
850407	Red/White Striped Tape	
850408	Black/Yellow Striped Tape	

NB: Cassettes fitted with approx. 10% extra tape. Do not retract tape past stated length, as cassette may damage.
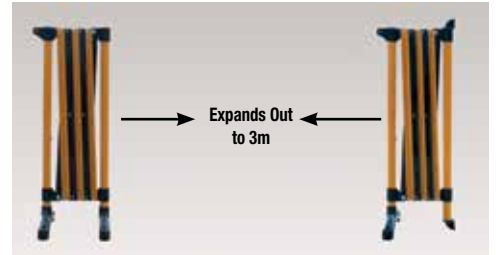

EXPANDING BARRIER SYSTEM

Compact and lightweight, these expanding barriers are suitable for indoor or outdoor use. The unique design of the extruded aluminum slats and vertical posts makes the system strong and lightweight, while the injection moulded plastic feet ensure the complete unit is durable and corrosion free. Available in different designs to suit your application - from standard expanding to flexi, allowing you to cordon off difficult areas or cope with changing floor levels. A versatile and portable solution to all your pedestrian and vehicular traffic control problems. All new models come boxed with all the attachments required for using you barrier in either the **free-standing** or **wall-mounted** configuration. This means that two separate barriers are now rolled into one. Comes with a sign mounting bracket and wall receiver bracket that allows your barrier to be locked to a wall or post when fully extended. Both new models are available in Red and White or Black and Yellow colour combinations.
Spare parts and accessories available on request.

TOUGHSTRIPE® FLOOR MARKING

SUPERIOR DURABILITY

Spend less time replacing damaged or worn lines for a better-looking, more efficient facility.

- Withstands forklift traffic without tearing or lifting
- Low-profile design minimises tears and scratches from skids, pallet jacks, etc.
- Rugged polyester with ultra-aggressive adhesive

EASY APPLICATION

Quickly lay down smooth, straight lines – without the help of co-workers.

- Can be easily applied by one person working alone
- Stiff polyester with liner prevents tape stretching and reduces wrinkles and wavy, uneven lines
- No special floor preparation required – just clean with common cleansers

* For maximum performance, apply ToughStripe® Floor Marking products to flat, non-coated concrete.

HIGH VISIBILITY

Get the same visibility of painted floor markings – and pay less.

- High-gloss surface shines like new paint
- Low profile minimises debris build-up along the edges that occurs with thicker (extruded) floor tapes
- Surface resists marks and smudges
- Available in a variety of high-impact colours

DIECUT SHAPES

Utilise different shapes, colours and sizes for more effective, durable floor markings.

- Dashes, dots, arrows, footprints, and corner marks (L, T and + shapes)
- Longer lasting markings – minimises the risk of damage and facilitates fast repair

PRE-SPACED SHAPES

Expedite installation and repair time.

- Dots, arrows and dashes packaged in rolls (not individually) and evenly spaced 455mm apart on a continuous liner
- Quick and easy one person installation; simply lay down the line like a continuous tape, and then remove
- the clear transfer tape from on top of the floor markings
- Eliminates the need to apply markings one by one
- Quickly lay straight, evenly spaced shapes
- Ideal for high traffic areas – if damaged only replace damaged shapes

PAINLESS REMOVAL

Easily remove floor markings without damaging the floor or leaving adhesive residue.

- Does not chip and flake when being removed – comes off in one piece
- Clean removal without any unsightly adhesive residue or damage to the floor

ToughStripe® Adhesion Overview

ToughStripe® Floor Tape Adhesion Rates

Floor Types

Silica Grit, Aluminium Oxide Grit, Garnet Grit, Particle Epoxy, Large Diamond Metal, Small Diamond Metal, Hexagonal Metal, Smooth Epoxy, Ceramic Tile, Linoleum Tile, Flecked Urethane, Solid Urethane, Concrete

Low Adhesion — Moderate Adhesion — Strong Adhesion

USE TOUGHSTRIPE® FLOOR MARKING PRODUCTS TO MARK:

- Aisleways and traffic lanes
- Work Cell outlines
- Equipment storage areas
- Material storage areas
- QA inspection areas
- Defects/scrap/rework areas
- "Keep clear" zones
- Hazard areas

PRE-SPACED SHAPES

Packaged in rolls (not individually) and spaced 455mm apart on a continuous liner, ToughStripe® Pre-Spaced Shapes make it easy to quickly lay straight, evenly spaced shapes. Simply lay down the continuous tape, and then remove the clear transfer tape. No need to apply markings one by one.

AISLE MARKING MACHINE

Designed for use with vinyl marking tapes, or warning tapes. Marks straight lines and curves easily. Best suited to 76mm tape.

STANDARD PACKAGE: 1

Part No.	Description
55538	Aisle Tape Applicator

B

Surface Preparation for Application: Pressure sensitive adhesives perform best on smooth, clean, dry surfaces. Use these guidelines for preparing surfaces for application:

1. If surface is contaminated with oil or grease, clean it with an evaporative solvent such as methyethylketone.
2. If surface is dirty, clean it with #600 emery cloth or 0000 steel wool, followed by solvent cleaning as above.
3. Rough surfaces can be smoothed with sandpaper, then with steel wool, and solvent-cleaned to remove residual dirt.
4. A final cleaning with a dry, lint-free cloth is advised to remove any solvent film.

AISLE MARKING TAPE

Specially formulated B-725 vinyl tape ensures long wear.
Colour pigmented throughout resists showing scratches.

HAZARD STRIPE ANTI-SLIP TAPES AND TREADS

Use this range of self adhesive tapes, treads and cleats to achieve maximum anti-slip protection whilst warning of dangerous areas. Highly visible with a very coarse, sandpaper-like grit non-slip surface. Available in rolls of tape or individually cut 'treads' for floor areas and walkways. Suitable for indoor or outdoor application. Surface prepartion is recommended. Apply to a clean dry surface.

FLOOR SIGNS

Self-adhesive walk-on floor signs consist of a substrate vinyl graphic which is protected by a tough clear textured overlaminate. The strong adhesive has been designed to bond to many different surfaces. Suitable for heavy traffic areas or wall mounting applications where graffiti or heavy wash downs are a problem. Suitable for internal use.

Clear Overlaminate Protects Warning Message.

SAFETY TRACK® RESILIENT TAPE

Safety Track® Resilient is tough enough to use where other grit anti-slip tapes are used, but is gentler to the touch. An embossed blend of synthetic products create a high performance, non-skid surface. Safety Track® is easily cleaned and can be mopped. Ideal for clean rooms, laboratory facilities and food processing plants. Made of black laminated calendered film.

CONFORMABLE ANTI-SLIP TAPE

Extremely durable anti-slip traction system designed to conform to irregular or uneven surfaces. The self-adhesive, high traction tape has a special aluminium backing which allows it to stick to rugged surfaces and around corners without losing performance. Ideal for ladder rungs, steps, walkways and diamond plate decking, it is equally effective indoors or outside.

Use with surface primer and edge sealing compound to form an unbeatable, long lasting system.

TREAD RITE SLIP RESISTANT COATING

Tread Rite Slip Resistant Coating creates durable slip-resistant surfaces around the home and workplace. The unique formulation provides uniform coverage and is easy to apply to any interior/exterior metal, concrete, ceramic or wood surface. The tough, dried finish resists cracking and peeling and exposure to petrol, oil and mild chemicals.

Ideal for stairs, ramps, walkways and pool decks.

RUBBER TACTILE INDICATORS

Tactiles meet the Australian Standard AS/NZS 1428.4, Building Code of Australia and exceed the anti-slip requirements of AS/NZ 4586. Guaranteed to conform to each of the dimensional requirements and provide safe and effective tactile cues for the vision impaired.

These Tactile Indicators have a raised profile to alert visually impaired individuals of an upcoming hazard, or provide them with guidance for safe passage. The Tactiles are available in two types: round ridge patterns for warning of hazards; or a long, straight ridge pattern for directional guidance. The adhesive is a strong two-part mixture that is suitable for both indoor and outdoor use.

Terracotta   Grey
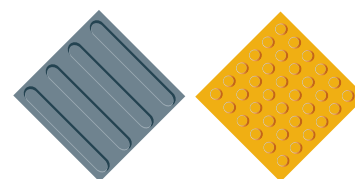

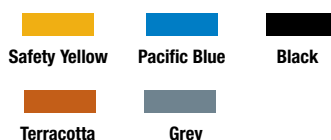

Ridge Pattern for Directional.

Stud Pattern for Warning.

Complies to AS/NZS 1428.4 Tested to AS/NZS 4586, R13 Slip Resistance, exceeding the R10 requirement.

POLYTILE PEEL AND STICK ADHESIVE BACKED TACTILE INDICATORS

NEW

- Complies to AS/NZS 1428.4.1.2009
- Fast, easy installation
- DIY, no special technical skills or tools required
- No down time, installation can be walked on immediately
- Low cost effective supply/install
- R12 safety rated

PolyTile Tactiles are an effective way of providing guidance cues. Supplied with a super strong, PSA peel and stick backing, PolyTiles can be installed internally quickly and cost effectively.

Manufactured from strong, durable polyurethane polymer which has greater wear resistance than steel. This provides a flexible, hard wearing and long lasting tactile which is suitable for extremely highly traffic installations such as in the transport and education sectors. Will not discolour, crack or degrade over time.

* GST applies to adhesive and installation kit. All tactile indicators are GST exempt.

STAINLESS STEEL INDICATOR STUDS

Designed to meet all aspects of the AS/NZS 1428.4 Tactile Ground Surface Indicators including the minimum luminance contrast and anti-slip requirements. Indicators comply with the Building Code of Australia and exceed the anti-slip requirements of AS/NZ4586. The grit option is ideal for metallic surfaces to achieve 60% luminance requirements under AS/NZS 1428. All styles have achieved a R13 Slip Rating which is the highest available under AS/NZS 4586.

Studs are 35mm in diameter, 5mm protrusion height. Spigot measures 15x6mm. Note: To cover an area of 600 x 900mm, you will need 216 studs - generally the minimum requirement for a single hazard, however you will require two lots to cover the top and bottom of the hazard.

STANDARD PACKAGE: 1

Part No.	Description	Stud Type	B
848446	Stainless Steel	Spigot	
848447	Stainless Steel	Non-Spigot	
861032	Grit, Yellow	Spigot

861039	Additional Adhesive	For Non-Spigot Stud	

Installation Kits:
Spigot Installation Kit includes – template, 6mm drill bit with limit sheath, adhesive, caulking gun, installation instructions.

Plain-Backed Installation Kit comes with – template, cleaning agent, abrasive pad, adhesive, adhesive applicator gun, installation instructions. For additional adhesive see price table.

* GST applies to adhesive and installation kits.
  All tactile indicators are GST exempt.

Note: Adhesive in kits will cover a 600 x 900mm area at the top and bottom of a hazard. Additional adhesive for spigotted studs will do approximately 300 studs, additional adhesive for non-spigotted studs will do approximately 120 studs. With a depth of 600mm, 240 studs cover 1 lineal metre.

Complies to AS/NZS 1428.4 Tested to AS/NZS 4586, R13 Slip Resistance, exceeding the R10 requirement.

VISUAL WARNING

TACTILE INDICATOR PLATES

316 marine grade stainless steel tactile plates are easy to install. With six pre-drilled and countersunk holes it's easy to locate the plates and secure them down.

Architecturally attractive and provide a cost effective method over difficult substrates such as escalator maintenance hatches, carpet with underlay and timber decking.

They are available in 300 x 600mm sections which satisfy almost all installation requirements, with 72 stud pieces per plate.
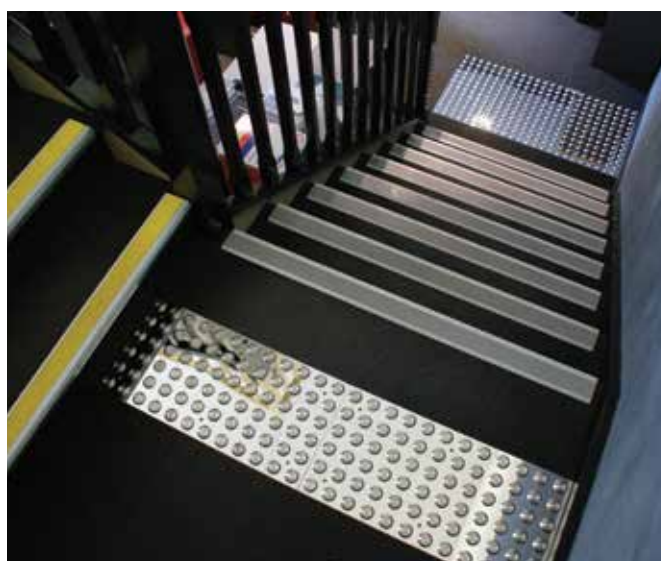

Dimensions: 300 x 600mm
STANDARD PACKAGE: 1

Part No.	Description	Dimensions	B
872368	72 Studs	300 x 600mm	

Note: All tactile indicators are GST exempt.

ANTI-SLIP STAIR NOSINGS

A necessity for busy stairways, these Anti-Slip Stair Nosings ensure grip on steps, whether outdoors or indoors. The grit finish is designed for outdoor use, being a stronger compound and offering substantially more traction. The rubber finish is designed for indoor use. Easy to install, the aluminium extrusions are pre-drilled and come in pre-cut 900mm or 1200mm lengths. Carpet-friendly extrusions are also available which feature 'grippers' so nosing doesn't move. Choose the appropriate kit to suit your application. Kit includes self-adhesive anti-slip inserts (grit or rubber), stainless steel screws and plastic screw anchors. Simply use an 8 gauge drill-bit for surface. Kit and extrusion required for each individual step. Available with a standard 30mm leading edge or in A Series with a 10mm leading edge for NCC compliance.

Meets width and luminance contrast requirements of BCA 3.2 and AS/NZS 1428.1:2001. Both surfaces tested to AS/NZS 4586:2004 – Grit R13, Rubber R10.

STANDARD BARRICADE TAPE

Printed Barricade Tapes warn against hazards or dangerous work zones with specific warning messages. The durable, yet lightweight tape comes in easy-to-use rolls so that it can be put up quickly to block off large areas of danger. Wrap it around poles and barrels, or staple it to wood. When the hazard is removed, roll up the tape for reuse. Thickness 80um.

$ For pricing, please contact your Brady distributor or our Customer Service team.

DETECTABLE WAVE UNDERGROUND WARNING TAPE

Manufactured using one or more stainless steel tracer wires laid in a sinusoidal wave pattern and laminated between two layers of polyethylene tape. This unique design allows the wires to stretch by over 25% before breaking. The wire is a minimum 304 grade 0.5mm diameter stainless steel manufactured to BS 1554. The tensile strength of the wire is 850N/mm and the tape is 43N/mm.

STANDARD PACKAGE: 1

BARRICADE FENCING

Can be easily erected and supported either by steel fencing pins or pinned to wooden fence posts for more permanent use.
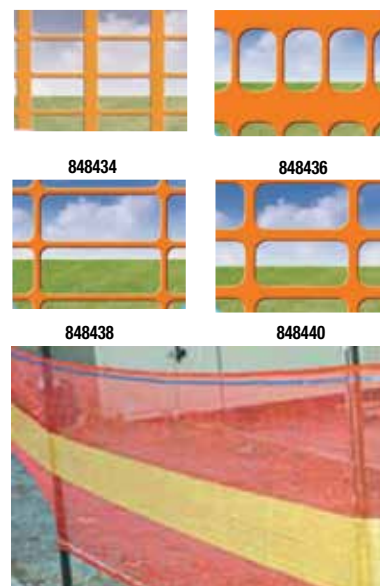

FENCE NETTING
All purpose temporary fence which is ideal for short term work. Comes with suspension cord top and bottom for easy installation.

BARRIER FENCING LIGHT AND MEDIUM WEIGHT
Ideal for cordoning off areas on construction sites and sporting events. Manufactured in different weights and grades for higher visibility and more protection. Stretched polypropylene for strength.

BARRIER FENCING HEAVY AND SUPREME HEAVY WEIGHT
Australian made high strength, high quality, and heavy-duty fencing mesh. Ideal for use when a long term barrier is required. It has high levels of UV stability and the strong high-density polyethylene assists with fewer star pickets and easier erection.

BOUNCE-BACK WARNING POSTS

Easy to install warning posts, used to avoid accidental dig-ins and service interruptions on building and construction sites, in fields, car parks and land development areas. Constructed from tough, UV stabilised polycarbonate, when hit by vehicles these posts bounce back undamaged (from speeds up to 50 km/h) making them ideal for high traffic and construction areas. The 1.6m high white post can be used with the highly visible sign which can be read from up to 10m.

STANDARD PACKAGE: 1

Part No.	Description	Dimensions	B
856955	Post	1.6m	
See below	Sign	75 x 300mm	
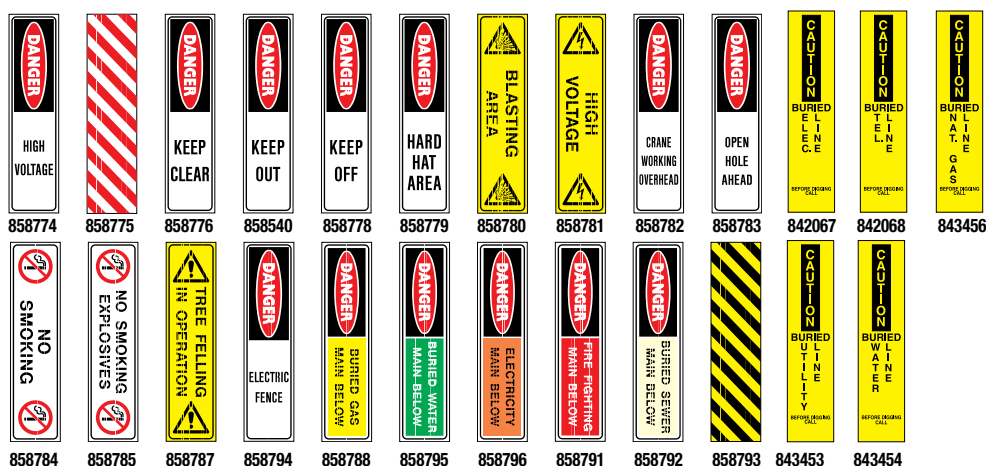

Bounce-Back Posts are durable and flexible. If driven over they simply "Bounce Back" into position.

Tough Polycarbonate Posts have a pointed end for ground fixing. Highly visible legends get your message across.

CUSTOM SITE BANNER MESH FENCING

With some Local Governments enforcing the cleanliness of construction sites regarding dust or debris falling onto adjoining streets, parks or properties, effective dust control should be in place. Improve your company's image in the community with this fencing mesh, and also include your company's logo or aspects of your project for recognition.

Constructed from a dense, 300gsm PVC mesh which provides approximately 85% blockage and withstands higher wind loads compared to shade cloths. Prints are more vivid, and pricing includes full colour coverage as required. Comes complete with hemmed and eyeleted finish.

Note: Turnaround time can be up to 3 weeks dependent on time of artwork proof approval sign off.

Light Transmission of 85%
Air Permeability 28%

_____ x 50m rolls

3. FILE FORMAT

The following file formats are accepted:
- Photoshop (CS2)
- Illustrator (CS2)
- InDesign (CS2)
- High Resolution PDF

4. ARTWORK PROPERTIES

- Preference for files is to be in Vector based EPS format (TIFF or PDF is acceptable)
- Artwork needs to be created in CMYK format for correct colour matching.

NB: Pantone colours can not be reproduced in CMYK or RGB format.

- All text needs to be converted to paths/outlines, alternatively fonts need to be supplied as separate files.

5. FILE SIZE

Recommended resolution for files is 300 dpi. Images larger than 841 x 594mm should be created in a reduced scale to minimise file size. As a guide please use the following reductions:

- Files larger than 1m in length or width: 50% (500 x 500mm)
- Files larger than 3m in length or width: 25% (750 x 750mm)
- Files larger than 5m in length or width: 10% (500 x 500mm)

Note: Please provide minimum 10mm bleed based on final image size. For large files flatten the image prior to sending.

6. PROOFING

Proofs are required to be signed off prior to printing. Due to custom aspect of this product, this mesh can not be returned.
