Gardian Test Tracker

#1 Trusted Software for Rapid Antigen Testing

Product Description

Gardian Test Tracker is an encrypted cloud-based software platform that helps you through your COVID-19 testing procedure. The software manages registration, capture of consent, results notification and reporting, giving your healthcare teams more time to focus on what matters. The solution is used for Rapid Antigen Testing, onsite PCR testing and other test types.

Gardian Test Tracker can:

- Help your team manage their testing procedure and workflow.
- Track the status of every test to ensure compliance through a fully auditable process. Allocate roles for each member of your testing team to focus on what they do best. Share results with health departments to streamline communication processes.
- Notify individuals of COVID-19 test results with text message or email.
- Manage multiple test types from a single access portal.

Gardian Test Tracker has been built to ensure that your tests are always conducted in accordance with best practice for point of care testing.
